

## IEEE T-BIOM Special Issue Proposals

T-BIOM hosts Special Issues on topics of especial and specific emergent interest, on conferences, and on workshops. This description aims to cover all eventualities, and its structure could be used as a pro-forma for an application. There is some guidance here. Special issues can widen as well as focus our Transactions so we encourage innovation, novelty, and creativity.

Proposals should be about 2-3 pages, max, + biographies and references.

### 1. Title

If the special issue is on a topic choose a title that is punchy, topical and relevant.

### 2. Authors

### 3. Motivation and Relevance to T-BIOM

How is the topic or meeting suited to T-BIOM? How will the papers meet the standards required by TBIOM?

### 4. Topics

All topics to be included in the Special Issue. Description of the special issue/ event (including its acceptance rate).

### 5. Invitation Process

We will advertise this in the News section of the Council website. How will you otherwise disseminate and popularise it? If it's for a meeting describe the selection of papers to be invited, emphasising high quality.

### 6. Tentative Timeline

From invitation to submission including closure date.

### 7. Guest Editors

Please include IEEE Type biographies.

### 8. References
